

Architect

Team Lead

DevOps

Team Lead

Product Owner

QA

Developer

Project Coordinator

My focus as a **Team Lead**;

- * Take responsibility for the work of the entire team
- * Develop technical design solutions to large problems by working with other team leads, architect, product owner, and other teams.
- * Coaching developers on best practices
- * Collaborate with technical leaders outside of the team.
- * **I work with the PO to make sure our stories are INVEST and technically appropriate**

I consider **business & technical priorities to optimize an approach to enable the team to get stuff done!**
